The Institute of Islamic Understanding Malaysia (IKIM) in collaboration with Sultan Zainal Abidin University (UniSZA) organised the “Addiction, Family and Community Sustainability” Experts Consultation on 15 - 16 August 2018. The Consultation was officialised by YBhg. Datuk Haji Zakaria bin Hashim, Deputy Chairman of IKIM.

The purpose of the expert consultation is to describe the threat of addiction to the preservation of family, community and country. The sharing of views and experiences by the experts are critical as contribution to a clearer understanding of addiction issues and how religious values can empower family institutions as a social unit that function as agents of attitude change in facing the addiction phenomenon.

Also present at the programme were group of researchers and representatives from various universities, ministries, agencies, religious departments, State Islamic Religious Councils and non-governmental organisations (NGOs).

Objektif kursus adalah untuk memberikan para peserta pendedahan tentang makna dan kaedah amalan hijau serta aplikasiannya dari sudut pandang Islam. Selain itu kursus ini turut memberi kefahaman dan contoh-contoh amalan hijau dalam kehidupan seharian serta menjadikan institusi masjid sebagai model dan teladan amalan hijau kepada masyarakat.

Bagi umat Islam, institusi masjid merupakan institusi yang menjadi teras kepada aktiviti kehidupan bermasyarakat. Memandangkan amalan hijau amat dituntut selari dengan ajaran Islam, maka aplikasi dan pembudayaan amalan hijau seharusnya bermula berpusat di masjid dan menular darinya. Contoh-contoh penting dari masjid-masjid di luar negara turut ditekankan.

The objective of the course is to provide exposure to participants on the meaning and method of green practice and its application from the Islamic point of view. In addition, the course also provides understanding and examples of green practices in everyday life as well as making the mosque as a model and an example of green practice to the community.

For Muslims, the mosque is the core institution to social activities of the community. Given that green practice is strongly demanded in Islamic teachings, the application and cultivation of green practice should centre at the mosque and move from there. Important examples from mosques abroad are also emphasised.
